

# Frequently Asked Questions

## Answers to common questions

### Unanswered Questions

If you have a question that is not answered here, please let me know by sending me an e-mail to [tobias.vlcek@uni-hamburg.de](mailto:tobias.vlcek@uni-hamburg.de) or by creating an issue on [GitHub](#).

### Contribution and Mistakes

If you have found a mistake in the course material or if you have any suggestion on how to improve the course, please let me know in the [following form](#) or by creating an issue on [GitHub](#).

### FAQs

#### Is the course difficult?

In terms of difficulty, this is of course somehow complicated for me to assess. However, I have tried to make all the content as comprehensible as possible and really do ask you many questions in the lectures. If I have the impression that something has not been understood at all, then I take longer at that point. This semester is the first time I think the course is truly finished. I have adapted the slides based on feedback from the last two years and made all the examples as simple as possible. **In a nutshell:** If you are interested in the subject and equations do not scare you, you will likely do great in the course.
